

New education products SDS

Innovative, efficient and “green”

SDS New Ranges – specialist products from a single source!

These new Ranges further expand SDS’ supply offering without increasing warehouse space, freight impact and catalogue size!!

SDS’ vision is that all Queensland schools should be able to get everything they need from a single source of supply, thereby saving them time and transaction costs and protecting their core function of prioritising the education of young Queenslanders.

High product standards are important to the Education sector as any breakage or premature obsolescence causes great distraction and annoyance due to diversion of staff from core school duties. Curriculum product quality carries an even higher value as integrity of product and supply directly affects the delivery of education itself.

Now, four exciting new curriculum ranges are being added. For each range SDS will be partnering with the most trusted suppliers that have already established strong relationships with schools.

This project will deliver unprecedented access by schools to specialist school supplies through a **single source** where they can also buy general office supplies and furniture. If schools utilise SDS to buy their specialist supplies the Education sector will make significant savings in reduced transaction costs and the time it takes to deal with different suppliers.

Environmentally this solution will incur a lesser freight impact and lower use of packaging. These suppliers will deliver their product direct to you, as they always have but unlike our other suppliers (except for Harts Sport) there will be no additional freight to our warehouse where boxes need to be unpacked, shelved and repacked.

Because there are over 1000 new products across four new categories in the 2012 catalogue offering, these extra products will only be available online.
